

MARKET REPORT May 2015 / 01

Almonds

The Californian Agricultural Statistics Services [CASS] released their 2015 Almond Crop Subjective estimate on the 6th May, with a figure 1.85 billion lbs. If correct, this would result in an average yield of 2,079 lbs per acre based on 890,000 bearing acres. Our reconnaissance trip through the valley, combined with discussions with Californian Growers and Packers leads us to believe the 2015 crop will be between 1.82-1.85 billion lbs.
