

MARKET REPORT February 2017 / 01

Almonds

Facts/Market Data:

On Thursday 9th February the Almond Board of California released their January 2017 Almond Position Report confirming shipments of 165.8 million lbs, a remarkable 28.3% increase over last year's 129.2 million lbs.

With 6 months of the season complete, California continues to ship record quantities: 1.116 billion lbs vs. 836 million lbs at the same point last season, an increase of 33.5%. We all expected an increase in January shipments compared to last year, most referred to 140 to 150 million lbs [an increase of 9-16%]; hence this increase was a surprise. The figure also surpasses the previous record January number of 160.3 million lbs which was shipped in January 2014. We have now seen record shipments in 7 out of the last 10 months.
