

## **MARKET REPORT May 2017 / 01**

### Almonds

#### Facts/Market Data:

The National Agricultural Statistics Services [NASS] released their 2017 Almond Crop Subjective estimate yesterday evening, with a 2017 crop figure of 2.20 billion lbs. If correct, this would result in an average yield of 2,200 lbs per acre based on the recently updated 1 million bearing acres. Our reconnaissance trip through the valley last month, combined with discussions we have had with Californian Growers and Packers, leads us to believe the 2017 crop will be between 2.18 and 2.25 billion lbs.
