

MARKET REPORT October 2022 / 01

Almonds

Facts/Market Data:

On Tuesday 11th September the Almond Board of California released the second position report for the almond year 2022/23. With very mixed signals leading up to the report commitments and new sales were more in focus than the actual shipment numbers. Receipt could give an indication of the expected crop size, but it is still very early days for that.

After the first two months of the almond year, shipments total 417 million lbs compared to 435 million lbs last year, and at 188.4 million lbs, shipments came in with a sobering number of minus 39 million lbs or 17.6%.
